

Pipes

LK Underfloor Heating Pipe PE-Xa

PE-Xa pipe with oxygen barrier for under floor heating. PN 6 bar. Maximum operating temperature 70 °C (short time maximum peak temperature 95 °C)

Material Consumption

- Pipe dim 8 x 1,0 pipe distance c/c 120 mm, approx. 8,8 m/m²
- Pipe dim 12 x 2,0 pipe distance c/c 150 mm, approx. 7 m/m²
- Pipe dim 16 x 2,0 pipe distance c/c 160 mm, approx. 7 m/m²
- Pipe dim 16 x 2,0 pipe distance c/c 200 mm, approx. 5,7 m/m²
- Pipe dim 16 x 2,0 pipe distance c/c 240 mm, approx. 4,6 m/m²
- Pipe dim 16 x 2,0 pipe distance c/c 300 mm, approx. 3,8 m/m²
- Pipe dim 16 x 2,0 pipe distance c/c 320 mm, approx. 3,5 m/m²
- Pipe dim 16 x 2,0 pipe distance c/c 400 mm, approx. 2,8 m/m² (Industrial premises)

Article	Dim.	Length	Weight (kg)	Packaging

The CO₂ equivalents represent the GWP-total (A1-A3) as a result from our EPD/environmental product declaration.

LK Heating Pipe PE-Xa PiP

PE-Xa pipe mounted in conduit. Used as feed pipe between heat source and LK Manifold.

Article	Dim. PE-X pipe	Dim. conduit (mm)	Length	Weight (kg)	Packaging
241 78 29	25 x 2,3 mm	34	50 m	15,5	1/6
243 46 34	25 x 2,3 mm	34	25 m	7	1/9
241 78 30	32 x 2,9 mm	42	25 m	12,9	1/3
241 90 74	32 x 2,9 mm	42	50 m	28	1/3

The CO₂ equivalents represent the GWP-total (A1-A3) as a result from our EPD/environmental product declaration.

LK Conduit

Made of parallel corrugated PP as protective conduit to LK PEX and PAL pipes.
The LK Conduit can also be used to reduce heat transmission in underfloor heating systems for the feeding pipes between the manifold and floor heating area.

Article	Dim. conduit (mm)	For pipe dim.	Length	Color	Weight (kg)	Packaging
187 06 65	25	16	50 m	Gray	3,6	1/12
187 06 66	34	20-25	50 m	Gray	5,6	1/18

Concrete & Screed Encapsulated Systems

LK System Plate 30

Insulation plate of EPS, 30 mm thick with castellated pipe holders for LK Universal pipe Ø 16 mm.

Pipe spacing ability c/c 80, 160, 240, 320 mm ect.

Short time lasting compression strengths SS 169524, 200kPa (S200)

Long lasting compression strengths 65 kPa (3% compr. in 50 years).

Thermal conductivity capability 0,033 W/m °C.

Installation height, including System Board 30 and excluding the top floor, is 85 mm at the lowest

Material Consumption

- Approx. 1 package/10 m²

Article	For pipe dim.	Length	Width	Height	Area (m ²)	Weight (kg)	Packaging
241 75 10	16 mm	800 mm	640 mm	30 mm	10.2	12	1

LK Clip Rail Combi 16/20

- Quick and easy installation
- 100% recycled material

The LK Clip Rail Combi is intended for use in single or double layer concrete structures and is suitable for pipes 16 and 20 mm in size. The clip rail is 10.2 metres long and is supplied folded up. It is easy and fast to lay. Clip rails can be easily joined and extended. Material consumption 0.12 units/m².

The clip rail is available in two versions and is made from recycled plastic. One version has inbuilt mm barbed staples and is intended for use when laying EPS insulation. The other version does not have barbed staples and is nailed or clipped in place in the slab using concrete nails and a nail gun.

Article	Type	For pipe dim.	Length	Height	Packaging
241 04 56	Without nails	16 & 20	10,2 m	27 mm	1/7/70
241 04 57	With nails	16 & 20	10,2 m	56 mm	1/7/70

The CO₂ equivalents represent the GWP-total (A1-A3) as a result from our EPD/environmental product declaration.

LK Clip Rail

For LK Universal pipe/LK Floor Heating pipe. Intended to be used where necessary additional insulation is satisfactory. Fix to insulation with LK Pipe Holder Art. no. 241 75 17 or 241 81 08. On concrete floors the clip rail is nailed or screwed to the floor.

Material Consumption

- Dim 8 and 12 approx. 1,7 pcs/m²
- Dim 16 and 20 i 2 m length, approx. 0,6 pcs/m²
- Dim 16 and 20 i 4 m lenght, approx. 0,3 pcs/m²

Article	For pipe dim.	Length	Height	c/c	Color	Weight (kg)	Packaging
241 81 25	20 mm	2,0 m	25 mm	50 mm	Brown Gray	0,8	1/10/1050
241 76 99	20 mm	4,0 m	25 mm	50 mm	Brown Gray	1,56	1/10/700

LK Clip Rail

For LK Under Floor Heating Pipe dim 16/20. Used where there is no need for additional insulation. The rail has an adhesive tape to fix to the insulation. If necessary it can be completed with LK Pipe Holder Nail, Art. no. 241 75 17. The Clip Rails can be snapped together to form longer lengths.

Article	Dim.	For pipe dim.	Length	Height	Packaging
---------	------	---------------	--------	--------	-----------

LK Pipe Holder

Used for fixing pipes at the pipe turns when installing under floor heating using LK Clip Rail or LK System Plate. LK Pipe Holder is also used for fastening the clip rail on to insulation. As standard LK Pipe Holder 65 mm is used. For thin insulation applications the 42 mm version is used.

Material Consumption

- Length 65 mm approx. 3 pcs/m²
- Length 42 mm approx. 6 pcs/m²

Article	For pipe dim.	Length	Packaging
241 75 17	8-12-16-20 mm	65 mm	1/100/5000

LK Staple Gun and LK Staples 3D Premium

Patented system for fixing clip rails and pipes.

LK Staple Gun 3D Premium is used together with LK Staples 3D Premium for attachment of LK Under Floor Heating Pipe to EPS insulation in e.g. pipe bends and between clip rails. LK Staple Gun 3D Premium is used together with LK Staples 3D Premium for attachment of LK Under Floor Heating Pipe to EPS insulation in e.g. pipe bends and between clip rails. The Staple Gun is also used for attachment of pipes to LK Foil board 30 silent.

The mechanism of the staple gun is safe and robust. If despite this a clip gets stuck in the mechanism, you can easily clean it by opening a cover and removing the clip which is stuck. LK Staples 3D Premium are particularly firmly attached in the EPS insulation, as the leg of the staple has a unique design equipped with holding nails on three sides.

The staples are welded together in rows to allow easy filling of the Staple Gun. The gun is filled with 75 staples each time it is loaded.

Material Consumption

- about 1 box/130 m² for the attachment of LK Clip-Rail 16 and LK Floor Heating pipe on cell foam insulation.
- about 1 box/29 m² for the attachment of floor heating pipe with c/c 200 on LK Foil Board 30 Silent.
- about 1 box/42 m² for the attachment of floor heating pipe with c/c 300 on LK Foil Board 30 Silent.

Article	Type	For pipe dim.	Length	Packaging

The CO₂ equivalents represent the GWP-total (A1-A3) as a result from our EPD/environmental product declaration.

*Note! Sold in packages of 400 staples (1 = 1 carton à 400 staples).

** Refers to insertion length

LK Staples

LK Staples are used with LK's older Staple Gun (Art.no. 241 81 45, see picture) to fix the floor heating pipe to the insulation in pipe bends and in between clip rails. The staples are delivered in a box with 270 pcs or 300 pcs depending on dimension.

The staples are joined together in rows for easy refill of the staple gun. As standard 50 mm is used, and on concrete slabs with thin insulation the short staple is used.

Material Consumption

- Length 40 mm, approx. 1 box/75 m²
- Length 50 mm, approx. 1 box/100 m²

Joist Systems

LK HeatFloor 22, Slotted Board

22 mm floor grade chipboard 'tongue & grooved' all round. The board has slots centered at 200 mm or 300 mm for LK Underfloor heating Pipe Ø 16 mm. The board is made in two quality classes, standard P6 and moisture resistant P7. The board shall be supplemented with LK Heat Distribution Plate 16/190, Art. no. 241 80 09 or LK Heat Distribution Plate 16/280 art.no 298 88 70.

Building height incl. pipes 22 mm.

LK Systems offers collection of used LK HeatFloor 22 boards. Please contact your local sales representative, who will assist you further in the process.

Material Consumption

- Approx. 1,0 pcs/m² excl. turning zone surface

*Nordic Swan Ecolabelled

LK HeatFloor 22, Turning Board

Floor grade chipboard 22 mm with turning slots on the upper side at c/c 200 mm or c/c 300 mm for LK Underfloor heating Pipe Ø 16 mm. The board is made in two quality classes, standard P6 and moisture resistant P7.

Building height incl. pipes 22 mm.

Turning slots on the upper side.

Can be installed on floor joists and on existing floor.

4 entry/exit slots.

Material Consumption

- 1,4 pcs/m turning zone (cc 200)
- 0,85 pcs/m turning zone (cc 300)

Article	Length	Width	Height	c/c	Quality class	Weight (kg)	Packaging

LK Heat Distribution Plate 16/190

LK Heat Distribution Plate 0,45 mm aluminium made for LK Universal pipe Ø 16 mm. The plate can be shortened by snapping across 3 pcs break lines..

LK Heat Distribution Plate 16/190 is intended for the LK Floor Heating systems below:

LK HeatFloor 22, Slotted board

LK Cross Battening installations

LK Slotted Board EPS 30/50/70 at pipe spacing c/c 200 mm

LK Slotted Board Silencio 36

Material Consumption

- LK HeatFloor 22, Slotted board, approx. 4 pcs/m²
- Cross Battening installations, approx. 4 pcs/m²
- LK Slotted Board EPS 30/50/70, approx. 4,2 pcs/m²
- LK Slotted Board Silencio 36, approx. 4,2 pcs/m²

The CO₂ equivalents represent the GWP-total (A1-A3) as a result from our EPD/environmental product declaration.

LK Floor Joist Plate 16

3 slots centred at 200 mm adapted for LK Under Floor Heating Pipe Ø 16 mm. Galvanised heat distribution plate 0,5 mm for installation between floor joists with centre distance of 600 mm between the joists and where a load-bearing floor is to be layed directly on the floor joists.

Material Consumption

- Approx. 3,7 pcs/m²

Article	Length	Width	Weight (kg)	Packaging
241 75 49	300 mm	595 mm	0,96	1/25/200

LK Floor Joist Plate AL

LK Floor Joist Plate AL with omega shaped grooves c/c 200 mm for installation on wooden joists at c/c 400 mm. The aluminium plate is available for both 16 mm floor heating pipes and 20 mm pipes. The plate is made of 0.5 mm aluminium. Three break points.

Article	For pipe dim.	Length	Width	Note	Packaging
---------	---------------	--------	-------	------	-----------

LK Heat Distribution Plate 20/280

For LK Under Floor Heating pipe Ø 20 mm. Heat distribution plate of aluminium 0,5 mm for laying between cross battening. The plate can be shortened by snapping across the three break lines. The width of the plate is intended for installation with c/c 300 mm.

Material Consumption

- Approx. 2,8 pcs/m²

Article	Length	Width	Weight (kg)	Packaging

Solid Floor & Floating Systems

LK HeatBoard 18

LK Underfloor Heating with LK HeatBoard 18 for installation on load-bearing floor structures. The system consists of a cardboard-based board with a laminated heat distribution layer for optimal heat dispersion.

LK HeatBoard 18 provides insulation and performs well under both short- and long-term loads.

Secure using adhesive or screws. Refer to the LK HeatBoard 18 installation guide for recommended suppliers and fastening products.

LK HeatBoard is not suitable for ceramic surface layers.

LK HeatBoard is not suitable for basements or slab-on-ground floors where relative humidity (RH) exceeds 85%.

Article	Length	Width	Height	Packaging
241 04 68	1175	800	18	1/60

LK CombiBoard EPS

- Minimal impact on room height with ultra-thin panels
- Patented technology ensures fast temperature response
- Streamlined design enables time- and cost-efficient installation

LK Floor Heating in design with LK CombiBoard EPS for laying on load-bearing floor constructions. The system consists of insulation boards of EPS class S300 equipped with a laminated heat distribution layer for optimal heat distribution. LK CombiBoard EPS has high insulating properties as well as being excellent for short- or long-term loads. The EPS boards are equipped with pipe channels and integrated turning channels.

Complete with glue or screws for attachment to the floor construction. See installation instructions LK CombiBoard EPS for information on recommended suppliers and products for attachment to floor construction.

LK CombiBoard EPS 14 with integrated turning channels – channel distance c.t.c (center to center) 160 mm – for 12 mm pipes

LK CombiBoard EPS 18 with integrated turning channels – channel distance c.t.c (center to center) 200 mm – for 16 mm pipes

LK CombiBoard EPS 30 / 50 / 70 with integrated turning channels and cross channel – channel distance c.t.c 200 mm – for 16 mm pipes

Material Consumption

- Approx. 1,1 pcs/m² floorheating surface

241 80 09	1150 mm	190 mm	0,31	1/60/480

The CO₂ equivalents represent the GWP-total (A1-A3) as a result from our EPD/environmental product declaration.

LK Heat Distribution Plate 16/280

LK Heat distribution plate in 0.45 mm aluminum adapted for LK Universal pipe dim 16. The plate can be length-adjusted with the help of 3 buckling instructions. The heat distribution plate is used for LK Track Disc EPS 30/50/70 mm for pipe laying cc 300 mm or for LK HeatFloor 22 for pipe laying cc 300 mm.

Material Consumption

- Approx. 2,8 pcs/m²

Article	Length	Width	Packaging
298 88 70	1150 mm	280 mm	1/40/320

The CO₂ equivalents represent the GWP-total (A1-A3) as a result from our EPD/environmental product declaration.

LK TB Staple 16

LK TB Staple 16 is used to fix the pipe (Ø16) into tracks on the turning boards and feeding boards of EPS.

Material Consumption

- 7 pcs/ turning board

Article	For pipe dim.	Note	Color	Packaging

LK Foil Board Silent

LK Underfloor heating together with LK Foil Board Silent for floating placement on loadbearing floor construction in dry spaces. The system is built with a 30 mm or 50 mm thick insulation board in EPS with step sound-absorbing properties for concrete intermediate floors. The boards are equipped with a foil with a grid pattern for easy installation of underfloor heating pipes together with LK Staple Gun 3D Premium.

EPS insulation board with a 100×100 mm grid-pattern foil for laying of LK Floor Heating.

LK Foil Board 30 Silent has impact-sound reducing properties that have been tested in laboratory in accordance with ISO 140-8.

On request, LK Systems can provide all the necessary data in order for an audio consultant to make accurate calculations for a completed building in accordance with SS-EN 12354.

When the board is installed on intermediate joists of concrete in accordance with LKs instructions, and the surface layer is covered with cell foam and a 14 mm parquet flooring, the floor heating construction provides a 21 dB impact-sound improvement.

Corresponding impact-sound improvement with 10 mm laminate flooring is 19 dB.

Article	Length	Width	Height	Note	Packaging
243 49 99	2 m	1 m	30 mm	Sold in packages of 5 pcs/boards (1 pack=10 sqm)	5/20

The CO₂ equivalents represent the GWP-total (A1-A3) as a result from our EPD/environmental product declaration.

LK Tape for Foil Board

LK Tape for foil board is used to join 2 foil boards where its original tape needs to be supplemented.

Article	Length	Width	Weight (kg)
298 90 20	66 m	50 mm	0,26

LK Staple Gun and LK Staples 3D Premium

Patented system for fixing clip rails and pipes.

LK Staple Gun 3D Premium is used together with LK Staples 3D Premium for attachment of LK Under Floor Heating Pipe to EPS insulation in e.g. pipe bends and between clip rails. LK Staple Gun 3D Premium is used together with LK Staples 3D Premium for attachment of LK Under Floor Heating Pipe to EPS insulation in e.g. pipe bends and between clip rails. The Staple Gun is also used for attachment of pipes to LK Foil board 30 silent.

The mechanism of the staple gun is safe and robust. If despite this a clip gets stuck in the mechanism, you can easily clean it by opening a cover and removing the clip which is stuck. LK Staples 3D Premium are particularly firmly attached in the EPS insulation, as the leg of the staple has a unique design equipped with holding nails on three sides.

The staples are welded together in rows to allow easy filling of the Staple Gun. The gun is filled with 75 staples each time it is loaded.

Material Consumption

- about 1 box/130 m² for the attachment of LK Clip-Rail 16 and LK Floor Heating pipe on cell foam insulation.
- about 1 box/29 m² for the attachment of floor heating pipe with c/c 200 on LK Foil Board 30 Silent.
- about 1 box/42 m² for the attachment of floor heating pipe with c/c 300 on LK Foil Board 30 Silent.

Article	Type	For pipe dim.	Length	Packaging

188 06 71	LK Staples 3D Premium *	8-12-16-20 mm	38 mm **	400/116

The CO₂ equivalents represent the GWP-total (A1-A3) as a result from our EPD/environmental product declaration.

*Note! Sold in packages of 400 staples (1 = 1 carton à 400 staples).

** Refers to insertion length

LK Edge Strip

LK Edge Strip is used to separate casting against walls and other fixed objects. The edge strip is fitted with a plastic film that stops floor screed from seeping under the insulation. The plastic film has a tape for sticking to the insulation. In addition the back of the edge strip is provided with tape to stick to walls or other fixed objects.

Manifold RF

LK Manifold RF

LK Manifold RF is made of stainless steel, the variants having 1 to 12 floor heating circuits. The manifold is delivered pre-mounted in brackets. The manifold has thermometers on the supply and return, manual air-bleed valves and filling/drain valves*.

(*Manifold RF 1 is supplied without thermometer or filling/drain valve)

The upper manifold marked FLOW (supply) is fitted with flow indicators graded from 0,5-5 l/min and adjustment valves for the adjustment of individual circuit flows. The flow indicators are made of temperature and impact resistant plastic.

The lower manifold marked RETURN has hand actuators for shutting off individual circuits. The manifold is ready to be connected to the left-hand side on delivery. Connection from the right is done by removing the end cap assemblies. Marking plates for identifying individual floor heating circuits, assembly instructions and a protective bag used to protect the manifold from e.g. splashes of concrete during the assembly period are enclosed.

The manifold requires additionally:

Two LK Ball Valves (Art. no. 241 75 50) or LK Ball Valve Angle (Art. no. 241 79 58). Where appropriate, the ball valve is replaced by LK OptiFlow EVO II. See product range for LK Adjustment Valves.

LK Connection Coupling for pipe range dim: PE-X/PAL pipe in dim 16 (Art. no. 241 72 98) / PE-X pipe in dim 12x2 (Art. no. 241 94 66) / PE-X pipe in dim 20x2 (Art. no. 241 94 68).

Connection dimensions:

Connection feed pipe, 1" female

Connection under floor heating pipe, ¾" male Eurocone

Dimensions:

The dimensions of the manifold are listed in the table below. Center dimension pipe connections is 50 mm with 25 mm displacement between flow and return. Additional length for accessories are stated below.

LK Ball Valve Straight: 65 mm

LK Ball Valve Angle: 70 mm

LK By-Pass RF: 15 mm

LK By-Pass Delta P RF: 155 mm

LK OptiFlow EVO II incl joint nipple straight: 123 mm

LK OptiFlow EVO II incl joint nipple elbow: 93 mm

LK Bracket RTB RF1

LK Bracket RTB RF1 is intended to mount LK Manifold RF 1 in LK Installation Cabinet RTB-XL. The bracket is available for connecting the feed pipes from the left or right side.

Article	Design	Packaging
298 89 95	Right	1/100
298 89 96	Left	1/100

LK By-Pass RF

Complete set for assembly of by-pass with kvs 0,05 on LK Manifold RF. The by-pass extends installed width by 15 mm.

Article	Packaging
241 94 69	1/50

LK By-Pass Delta P RF

LK By-pass Delta P RF is a pressure controlled by-pass valve. The by-pass valve is adapted for easy right or left hand connection to LK Manifold RF. The opening pressure can be set between 10-60 kPa. Maximum capacity 800 l/h. The by-pass extends installed width by 155 mm.

Article	Packaging
241 91 40	1/20

LK Automatic Air Vent RF

Intended for LK Manifold RF. Replaces the standard manual air vent. The air vent has both a manual and automatic venting function. The thread connection is fitted with an o-ring seal to the manifold.

Article	Dim.	Packaging
241 72 99	½"	1/12/96

LK Pressure Gauge VKF 0-16 bar

Pressure test gauge with a measuring range of 0-16 bar.

The pressure gauge has a ½" connection that fits the LK Manifold RF, the connection is provided with a o-ring and is self-sealing.

The pressure gauge can be used to test different systems such as underfloor heating, radiators.

Article	Measuring range	Nipple conn.	Packaging
241 03 09	0-16 bar	½" thread with O-ring	1/30

LK Valve kit VKF RF

LK Valve kit VKF RF is used when you need to expand an existing manifold to include another floor heating circuit.

LK Valve kit VKF RF replaces the manifold's drain valve and refill valve and both its air bleeding valves.

Article	Packaging
241 02 57	1

LK Mini Manifold

Nickel plated manifold for connection to LK Minishunt M60n. The manifolds have integrated lock-shield valves for balancing the flow of the floor heating loops. The manifolds are available for connecting from 2 to 4 under floor heating loops. Delivered incl. angle fittings ½" male thread and necessary connection couplings for LK PE-X pipe dim 12 mm, PE-X and PAL dim 16 mm or PE-X dim 20 mm. Mounted on LK Minishunt M60n the building height will increase by approx 90 mm.

Ancillaries RF

LK Coupling HF

- Quick installation
- Hemp-free connection
- Fits the hole pattern in LK's installation cabinets

LK Coupling HF is intended for hemp-free installation to the LK Manifold RF.

The coupling is available in both angled and straight versions. When combined, the couplings are dimensionally adapted to fit the hole pattern in LK's installation cabinets.

The coupling's swivel nut comes with a pre-mounted gasket, and the external thread of the straight coupling is sealed with an O-ring.

If needed, complement with LK Nipple HF for a hemp-free connection to LK Ball Valve Straight G25 / LK Optiflow EVO II.

LK Pipe Bending Support

Pipe bending support for LK Universal/Heating Pipe.

Article	For pipe dim.	Radius outer (mm)	Packaging
241 75 60	16 mm	120	1/50/1600

The CO₂ equivalents represent the GWP-total (A1-A3) as a result from our EPD/environmental product declaration.

LK Pipe Bending Support Open

Pipe bending support of plastic for LK Universal/Heating Pipe. Used for fixing pipes in 90°-bends. Fitted on any conduit pipe or directly on the pipe.

Article	For pipe dim.	Radius outer (mm)	Note	Packaging
243 54 96	12 mm	100		1/10/500
241 79 38	16 mm	120		1/50/500
243 54 98	20 mm	150		1/10/50
243 55 00	25 mm	180	Not suitable for LK Ground heating pipe 25	1/10/50
243 55 03	34 mm	230		1/10/50
243 55 05	25 mm (16 mm RiR)	150		1/10/40
243 55 18	42 mm	250		1/5/25

The CO₂ equivalents represent the GWP-total (A1-A3) as a result from our EPD/environmental product declaration.

LK Pipe Bending Support Open with mounting plate

- Mounting plate for easy fixing
- Made from recycled plastic

Pipe bending support of HD polyeten for LK Universal/Heating Pipe. The pipe bending support is equipped with an mounting plate for easy fixing.

Article	For pipe dim.	Radius outer (mm)	Note	Packaging
243 54 97	16 mm	120		1/10/50
243 54 99	20 mm	150		1/10/50
243 55 02	25 mm	180	Not suitable for LK Ground heating pipe 25	1/10/50
243 55 04	34 mm	230		1/10/50

The CO₂ equivalents represent the GWP-total (A1-A3) as a result from our EPD/environmental product declaration.

LK Pipe Bending Support with ear

Pipe Bending support with fastened ear.Works with Pex RIR with outer dimension 25.

Can be set separately with screws or attached to two togheterr to get 40 c / c.

Convenient for installation for radiators.

Article	For pipe dim.	Radius outer (mm)	Note	Packaging
188 24 01	25 mm	120	not suitable for LK Ground heating pipe 25	1/50

LK Fixing Plate

Fixes LK Pipe Bend Support Art. no. 241 75 60 during installation to LK Manifold. 8 loops can be fixed with one plate. The plates can be joined together for increased number of loops. Manufactured of polythene.

Article	Packaging
241 79 02	1/10/300

The CO₂ equivalents represent the GWP-total (A1-A3) as a result from our EPD/environmental product declaration.

LK Connection Coupling RF CU

LK Connection coupling for copper pipes to LK Manifold RF.

Article	Intended for	Dim.	Nipple conn.	Packaging

241 94 65	CU	15x1,0 CU	¾" EuroCone	1/24/240

LK Adapter

LK Adapter with loose nut for transition from ½" to ¾" EuroCone. Fits e.g. LK Manifold RF, LK Mini Loop Valve M5 and LK Mini Manifold 20.

Article	Dim.	Packaging
241 93 78	½" male / ¾" EuroCone	1/12/60

LK PushFit 8, Single female thread

LK PushFit to 8 mm floor heating pipe. E.g. used to connect to LK Manifold RF or LK Mini Loop Valve M5. Supplement with LK Adapter dim. ½" male/¾" EuroCone, Art. no. 241 93 78.

Article	Dim.	Packaging
241 94 13	8 mm / ½" female	1/30

LK PushFit 8, Duo

LK PushFit to 8 mm floor heating pipe. E.g. used to connect to LK Manifold RF or LK Mini Loop Valve RTB. Supplement with LK Adapter dim. 1/2" male/3/4" EuroCone, Art. no. 241 93 78.

Article	Dim.	Packaging
241 93 79	8 mm / 1/2" female	1/30

LK PushFit 8, Quattro

LK PushFit to 8 mm floor heating pipe. E.g. used to connect to LK Manifold RF or LK Mini Loop Valve RTB. Supplement with LK Adapter dim. 1/2" male/3/4" EuroCone, Art. no. 241 93 78.

LK Plug, Art. no. 241 94 11 is used to plug unused connections when only three loops are connected.

Article	Dim.	Packaging
241 94 12	8 mm / 1/2" female	1/20

Adjustment valves

LK OptiFlow EVO II

LK OptiFlow EVO II is a group valve for adjusting flow in, for example, under floor heating systems, traditional heating systems and cooling systems. The valve is available in two different flow ranges, 2-16 l/min and 4-36 l/min. The adjustment valve has 1" male thread on the inlet and 1" female thread on the outlet. The male thread is supplemented with an LK Joint Nipple with loose nut for simple assembly to, for example, LK Manifold RF for under floor heating.

Adjustment is performed easily using an Allen key, while the flow is read off on a clear scale. No measuring equipment is needed. The valve has a so-called MemoStop to lock the valve setting. This means that the valve can also be used as an isolation valve without changing the adjustment position when operating the valve. The valve housing is made of nickelplated brass and equipped with an impact and temperature resistant flow indicator. The flow meter continuously measures the flow during operation. The flow meter can be read in all positions. A marking plate for marking and documenting the setting is enclosed. The valve can be supplemented with an LK Thermometer (optional). The thermometer is located in the valve's integral sensor tube.

Article	Dim.	Flow range	Packaging
241 96 11	1" male/female	2-16 l/m	1/10
241 96 10	1" male/female	4-36 l/m	1/10

LK Joint nipple f/m

LK Joint Nipple can be used when LK OptiFlow Evo II will be installed. Joint Nipple is also suitable for LK Single Zone Manifold Control.

Article	Designation	Design	Type	Dim.	Voltage	Packaging

LK Insulator OptiFlow EVO II

- Quick assembly with clips
- Thermometer outlet
- For both heating and cooling applications

LK Insulator OptiFlow EVO II is used to insulate adjustment valve LK OptiFlow EVO II. The insulation is made from black EPP and is composed of two halves. The halves are pressed together and secured with two supplied plastic clips.

The insulation has a thermometer outlet.

For use in cooling applications the valve and insulation can be fitted with the optional LK Thermometer -20 - 60° C. (Article no. 243 52 54)

For use in heating applications the valve and insulation can be fitted with the optional LK Thermometer 0 - 80° C. (Article no. 243 47 47)

Article	Intended for	Color	Packaging

Group manifold

LK Manifold Qmax 2"

LK Manifold Qmax 2" is made of stainless steel and is intended to be used as a manifold for tap water, heating and cooling systems with high volume flow. The manifold is available with two, three, four or six outlets with 1" dia, the individual distance c/c 100 mm. The manifolds can be combined to receive the required number of outlets. The manifold must be supplemented with LK Ball Valve 2" and LK Plug 2" (only for floor heating) and LK Bracket Qmax. The manifold is delivered in a complete package with the required number of gaskets 2" and 1" dia. plus instructions. Also included is a brass plug 1/4" (for tap water) and a manual air vent (for the heating system), connection 1/4".

Area of use, tap water:

LK Manifold Qmax is used as a group manifold in systems where high volume flows are probable. The manifold is mounted in systems with the same pressure and temperature areas as Universal pipes, i.e. max 1.0 MPa at +95 °C.

Area of use, heating:

LK Manifold Qmax is used as a group manifold when several LK Manifolds need to be connected to the same heat source. LK Manifold Qmax is supplemented with LK OptiFlow Evo II allowing an easy adjustment/balancing of the flow to each LK Manifold from the same place.

Article	Length	No. of outlets	Manifold type	Packaging

Cabinets

LK Manifold Cabinet UFH

LK Manifold Cabinet UFH is designed for use where there is a requirement to conceal LK Manifold RF.

The cabinet has a dense base with rubber pipe grommets. The cabinet base is provided with a drainage opening which allows any water leakage to be drained to a location which can be inspected. The cabinet is manufactured from 1 mm powder-coated sheet steel, RAL 9016.

The cabinet is designed for installation built into a wall or surface-mounted on a wall. When building in the cabinet, the minimum stud thickness is 95 mm.

The cabinet must be supplemented with a frame/hatch. There are two types of frame/hatch, depending on whether the cabinet is built into or surface-mounted on an inner wall.

When surface-mounted, the cabinet must also be supplemented with a base in order to conceal pipes between the cabinet and the floor.

LK Manifold Cabinet UFH is supplied with pipe grommets, a bellow sleeve for drainage, a 1.5-metre conduit for drainage, drainage elbow with outlet plate, cable grommets for room control, spray guard and installation instructions.

The back of the cabinet is provided with four prefitted M8 nuts which can be used for attachment to the LK Cabinet Stand when the cabinet has to be installed before a concrete base is cast.

The ends of the cabinet are provided with knockout holes for any side connection of supply and return pipes.

The top side of the cabinet has knockout holes for any pipe routing through the cabinet and knockout holes for any cable grommets for room control.

NOTE! In cases where a riser is pulled inside the cabinet, the maximum number of outlets may be reduced by one or more.

Article	Intended for	Width	Height	Depth	Weight (kg)	Packaging

The CO₂ equivalents represent the GWP-total (A1-A3) as a result from our EPD/environmental product declaration.

LK Shunt Cabinet VS2

LK Shunt Cabinet VS2 is designed for use where there is a requirement to conceal LK Manifold Shunt VS2 and LK Manifold RF. NOTE: LK Manifold Shunt VS2 should be installed on the right-hand side of the cabinet.

The cabinet has a dense base with rubber pipe grommets. The cabinet base is provided with a drainage opening which allows any water leakage to be drained to a location which can be inspected. The cabinet is manufactured from 1 mm powder-coated sheet steel, RAL 9016.

The cabinet is designed for installation built into a wall or surface-mounted on a wall. When building in the cabinet, the minimum stud thickness is 95 mm. The cabinet must be supplemented with a frame/hatch. There are two types of frame/hatch, depending on whether the cabinet is built into or surface-mounted on an inner wall. When surface-mounted, the cabinet must also be supplemented with a base in order to conceal pipes between the cabinet and the floor.

LK Shunt Cabinet VS2 is supplied with pipe grommets, a bellow sleeve for drainage, a 1.5-metre conduit for drainage, drainage elbow with outlet plate, cable grommets for room control, spray guard and installation instructions.

The back of the cabinet is provided with four prefitted M8 nuts which can be used for attachment to the LK Cabinet Stand when the cabinet has to be installed before a concrete base is cast.

Article	Intended for	Width	Height	Depth	Weight (kg)	Packaging

243 53 62	Manifold Shunt VS2 + Manifold RF 8-12	1050 mm	710 mm	95 mm	13,2	1/7

The CO₂ equivalents represent the GWP-total (A1-A3) as a result from our EPD/environmental product declaration.

LK Manifold Cabinet HX

LK Manifold Cabinet HX is designed for use where there is a requirement to conceal LK Heat Exchanger Pack -10n2 and LK Manifold RF up to size VKF RF 5.

LK Manifold Cabinet HX with associated assembly instructions full fills Sweden's industry regulations "Säker Vatteninstallation". The cabinet has a dense base with rubber pipe grommets and is provided with a drainage opening which allows any water leakage to be drained to a location which can be inspected. The cabinet is manufactured from 1 mm powder-coated sheet steel, RAL 9016. The cabinet is designed for installation built into a wall or externally on a wall. When building in the cabinet, the minimum stud thickness is 145 mm.

The cabinet must be supplemented with a frame/ hatch, of which there are two types, depending on whether the cabinet is built into or installed externally on an inner wall. When installed externally, the cabinet must also be supplemented with a base in order to conceal pipes between the cabinet on the floor.

LK Heat exchanger package is mounted on the right side of the cabinet

LK Manifold Cabinet HX is supplied with pipe grommets, a bellow sleeve for drainage, a 1.5-metre conduit for drainage, drainage elbow with outlet plate, cable grommets for room control, splash protection and installation instructions.

Article	Width	Height	Depth	Weight (kg)	Packaging
241 03 18	800 mm	710 mm	145 mm	13,2 kg	1/8

The CO₂ equivalents represent the GWP-total (A1-A3) as a result from our EPD/environmental product declaration.

LK Manifold Cabinet Qmax

LK Manifold Cabinet Qmax is designed for use where there is a requirement to conceal LK Manifold Qmax 2". LK Manifold Cabinet Qmax with accompanying instructions is adapted to the industry regulations "Säker Vatteninstallation". The cabinet has a dense base with rubber pipe grommets. The cabinet base is provided with a drainage opening which allows any water leakage to be drained to a location which can be inspected.

The cabinet is manufactured from 1 mm powder-coated sheet steel, RAL 9016. The cabinet is designed for installation built into a wall or surface-mounted on a wall. When building in the cabinet, the minimum stud thickness is 95 mm. The cabinet should be assembled according to the industry regulations "Säker Vatteninstallation".

The cabinet must be supplemented with a frame/hatch. There are two types of frame/hatch, depending on whether the cabinet is built into or surface-mounted on an inner wall. When surface-mounted, the cabinet must also be supplemented with a base in order to conceal pipes between the cabinet and the floor.

LK Manifold Cabinet Qmax is supplied with LK Bracket Qmax, pipe grommets, a bellow sleeve for drainage, a 1.5-metre conduit for drainage, drainage elbow with outlet plate, cable grommets for room control, spray guard and installation instructions. The back of the cabinet is provided with four prefitted M8 nuts which can be used for attachment to the LK Cabinet Stand when the cabinet has to be installed before a concrete base is cast.

The ends of the cabinet are provided with knockout holes for any side connection of supply and return pipes. The top side of the cabinet has knockout holes for any pipe routing through the cabinet and knockout holes for any cable grommets for room control. Maximum pipe dimension for risers is 50 mm.

NOTE! In cases where a riser is pulled inside the cabinet, the maximum number of outlets may be reduced by one or more.

Article	Width	Height	Depth	Weight (kg)	Packaging

LK Manifold Cabinet HX

LK Manifold Cabinet HX is designed for use where there is a requirement to conceal LK Heat Exchanger Pack -10n2 and LK Manifold RF up to size VKF RF 5.

LK Manifold Cabinet HX with associated assembly instructions full fills Sweden's industry regulations "Säker Vatteninstallation". The cabinet has a dense base with rubber pipe grommets and is provided with a drainage opening which allows any water leakage to be drained to a location which can be inspected. The cabinet is manufactured from 1 mm powder-coated sheet steel, RAL 9016. The cabinet is designed for installation built into a wall or externally on a wall. When building in the cabinet, the minimum stud thickness is 145 mm.

The cabinet must be supplemented with a frame/ hatch, of which there are two types, depending on whether the cabinet is built into or installed externally on an inner wall. When

installed externally, the cabinet must also be supplemented with a base in order to conceal pipes between the cabinet on the floor.

LK Heat exchanger package is mounted on the right side of the cabinet

LK Manifold Cabinet HX is supplied with pipe grommets, a bellow sleeve for drainage, a 1.5-metre conduit for drainage, drainage elbow with outlet plate, cable grommets for room control, splash protection and installation instructions.

LK Manifold Cabinet Qmax

LK Manifold Cabinet Qmax is designed for use where there is a requirement to conceal LK Manifold Qmax 2". LK Manifold Cabinet Qmax with accompanying instructions is adapted to the industry regulations "Säker Vatteninstallation". The cabinet has a dense base with rubber pipe grommets. The cabinet base is provided with a drainage opening which allows any water leakage to be drained to a location which can be inspected.

The cabinet is manufactured from 1 mm powder-coated sheet steel, RAL 9016. The cabinet is designed for installation built into a wall or surface-mounted on a wall. When building in the cabinet, the minimum stud thickness is 95 mm. The cabinet should be assembled according to the industry regulations "Säker Vatteninstallation".

The cabinet must be supplemented with a frame/hatch. There are two types of frame/hatch, depending on whether the cabinet is built into or surface-mounted on an inner wall. LK Shunt Cabinet M60n

The LK Shunt Cabinet M60n is designed to be used when you wish to hide the LK Minishunt M60n. The cabinet is intended for right mounting, i.e. the primary shunt connection is from the right side via the cabinet base.

The cabinet has a sealed base with rubber pipe grommets. The base of the cabinet is fitted with a drainage opening which allows any water leakage to drain to a location that can be inspected. The cabinet is made from 1 mm powder coated steel plate, RAL 9016.

The cabinet is designed to be fitted built into a wall or externally on a wall. When built into a wall, the wall thickness must be at least 95 mm.

The cabinet should be supplemented with a frame/hatch. There are two types of frame/hatch depending on whether the cabinet is built into or installed externally on an inner wall.

For external mounting, the cabinet should also be supplemented with a base to hide the pipes between the cabinet and floor.

Prefabricated cabinets

LK Manifold Cabinet UFH Prefab

LK Manifold Cabinet UFH Prefab comes supplied as a complete unit with LK Manifold RF already fitted. The manifold has an isolation valve fitted to the supply pipe. For flow adjustment, LK OptiFlow Evo II is fitted to the return. The OptiFlow valve is also used as a shut-off valve. For sizes 2-8 an OptiFlow with flow setting 2-16 l/m is installed. For sizes 9-12 an OptiFlow 4-36 l/m is used.

NOTE: The cabinet is designed for right-hand side installation, i.e. the connection of the manifold is made from the right of the cabinet, either via the side panel or via the cabinet base.

The cabinet has a dense base with rubber pipe grommets. The cabinet base is provided with a drainage opening which allows any water leakage to be drained to a location which can be inspected. The cabinet is manufactured from 1 mm powder-coated sheet steel, RAL 9016.

The cabinet is designed for installation built into a wall or surface-mounted on a wall. When building in the cabinet, the minimum stud thickness is 95 mm.

The cabinet must be supplemented with a frame/hatch. There are two types of frame/hatch, depending on whether the cabinet is built into or surface-mounted on an inner wall. When surface-mounted, the cabinet must also be supplemented with a base in order to conceal pipes between the cabinet and the floor.

The cabinet comes supplied with pipe grommets, a bellow sleeve for drainage, a 1.5-metre conduit for drainage, drainage elbow with outlet plate, cable grommets for room control, spray guard and installation instructions.

The back of the cabinet is provided with four prefitted M8 nuts which can be used for attachment to the LK Cabinet Stand when the cabinet has to be installed before a concrete base is cast. The ends of the cabinet are provided with knockout holes for any side connection of supply and return pipes.

The top side of the cabinet has knockout holes for any pipe routing through the cabinet and knockout holes for any cable grommets for room control.

LK Minishunt Cabinet M60n Prefab

- For up to four circuits, 16mm
- With hatches for both built in to wall and for surface mounted cabinet

LK Minishunt Cabinet M60n Prefab comes supplied as a complete unit with LK Minishunt M60n and LK Mini Manifold already fitted, including couplings for connection of heating pipes dim. 16.

Note: The cabinet is designed for right-hand side installation, i.e. the connection to the shunt unit is made from the right of the cabinet, via the cabinet base.

The cabinet has a dense base with rubber pipe grommets. The cabinet base is provided with a drainage opening which allows any water leakage to be drained to a location which can be inspected.

The cabinet is designed for installation built into a wall or surface-mounted on a wall. When building in the cabinet, the minimum stud thickness is 145 mm.

The cabinet must be supplemented with a frame/hatch. There are two types of frame/hatch, depending on whether the cabinet is built into or surface-mounted on an inner wall.

LK Combi Cabinet VS2 Prefab

- Eliminates the need for additional radiator cabinets.
- Prefabricated for faster installation

LK Combi Cabinet VS2 Prefab comes supplied as a complete unit with LK Manifold Shunt VS2 and a manifold for four radiator manifolds already fitted, including couplings for connection of heating pipes dim. AX16.

LK Manifold RF and couplings are to be bought separatly.

Note: The cabinet is designed for right-hand side installation, i.e. the connection to the shunt unit is made from the right of the cabinet, via the cabinet base.

The cabinet has a dense base with rubber pipe grommets. The cabinet base is provided with a drainage opening which allows any water leakage to be drained to a location which can be inspected.

The cabinet is designed for installation built into a wall or surface-mounted on a wall. When building in the cabinet, the minimum stud thickness is 95 mm.

The cabinet must be supplemented with a frame/hatch. There are two types of frame/hatch, depending on whether the cabinet is built into or surface-mounted on an inner wall.

When surface-mounted, the cabinet must also be supplemented with a base in order to conceal pipes between the cabinet and the floor.

The cabinet comes supplied with pipe grommets, a bellow sleeve for drainage, a 1.5-metre conduit for drainage, drainage elbow with outlet plate, cable grommets for room control, spray guard and installation instructions.

The back of the cabinet is provided with four prefitted M8 nuts which can be used for attachment to the LK Cabinet Stand when the cabinet has to be installed before a concrete base is cast.

The top of the cabinet has knockout holes for any cable grommets for room control.

Hatches

LK Frame/hatch UFH INB

LK Frame/hatch UFH INB is designed for use with LK Manifold Cabinet UFH and LK Shunt Cabinet UFH when these cabinets are built into a wall.

Do not install in rooms with a waterproofing layer on the wall.

LK Frame/hatch UFH INB has a frame for mounting in the wall in order to cover the hole around the cabinet.

The hatch is fitted with a screwdriver latch on delivery, and a key latch is also available as an accessory.

LK Hatch HIDDEN

- The hatch becomes a natural part of the rest of the interior
- Adapted to LK's installation cabinet
- Supplied with factory fitted plasterboard

LK Hatch HIDDEN for manifold cabinets GV and UNI mounted built into the wall. Frame with hatch which has plaster which can be wallpapered or painted in the same color as the wall and becomes a natural part of the rest of the interior. The hatch has a small grip at the top which is used to open the hatch.

A wall plate of at least 13 mm is required and the cabinet must be mounted 5 mm inside the rule for

the frame to fit, see assembly instructions. When LK Manifold UNI-Valve is installed in the cabinet, the cabinet must be mounted 10 mm inside the rule and the number of connections will be reduced.

Should not be installed in rooms with a waterproof layer on the wall.

Made of 1 mm powder-coated galvanized steel sheet, white color RAL9016.

As standard, the hatch is equipped with a magnetic lock and as an accessory there is a key lock.

The hatch must be stored indoors.

The product has an international design registration.

LK Base UFH

LK Base UFH is used when Manifold Cabinet UFH is installed on the surface of an existing wall. LK Base conceals the pipe installation between cabinet and floor. The base is adjustable in height from 220 to 280 mm. The base is provided with holes for installation of cabinet drainage. If another position is used for cabinet drainage, the cover plug supplied is used to conceal the hole in the base.

Arc

LK ArcHub

LK ArcHub is a connected hub for controlling up to 12 floor heating circuits via LK Actuator 24 V and LK ArcSense/LK ArcTune.

A total of 12 LK ArcSense or LK ArcTune units can be connected via wired or wireless communication.

For wireless communication between ArcHub and ArcTune/ArcSense, add 1 x ArcTenna InWall or 1 x ArcTenna OnWall.

When connecting to the internet via WiFi (instead of a network cable), add 1 x ArcTenna InWall or 1 x ArcTenna OnWall.

For more information on related products, see the respective product.

LK ArcTenna OnWall

LK ArcTenna OnWall is an antenna intended for use when LK ArcHub does not have an internet connection, or when wireless communication is to be established between ArcHub and ArcSense/ArcTune.

LK ArcTenna OnWall is intended to be installed directly connected to an LK Manifold Cabinet, on the outside of a wall.

LK ArcTenna OnWall has two built-in antennas for WiFi and Bluetooth.

Article	Packaging

LK ArcTenna InWall

LK ArcTenna InWall is an antenna intended for use when LK ArcHub does not have an internet connection or when wireless communication is to be established between ArcHub and ArcSense/ArcTune.

LK ArcTenna InWall is mounted on the inside of an internal wall, normally via the top of a wall-mounted LK Manifold Cabinet.

If you have a wireless connection via Wi-Fi, you need 2 antennas. When networking via cable, only 1 antenna is required.

LK ArcByWire

LK ArcByWire is a circuit board used for wired communication between LK ArcTune/LK ArcSense and LK ArcHub.
The circuit board clicks easily into the LK ArcFrame wall bracket.

Article	Packaging
241 04 81	1/25

LK ArcBatteries

LK ArcBatteries are high quality type CR2450 lithium batteries.
LK ArcBatteries are used for LK ArcSense or LK ArcTune for wireless communication with LK ArcHub.
Each pack contains 2 batteries.

Basic wired communication

LK Room Thermostat S1 (NO)

Electronic, soundless room thermostat with Triac-output and self-modulation technology. Available in models S1, S1 EXT and S1 Dti; S1 EXT and S1 Dti has got extra connections for the possibility to connect LK External Sensor S1 for control of floor temperature. The room thermostat is powered by 24 V AC and is designed for normally open LK Actuator 24V (NO). Connection is normally made via LK Connection Box (NO) or via LK Connection Box 1. Max 5 LK Actuators 24V (NO) can be connected per room thermostat.

The room thermostat temperature range is between 5-35 °C. Adjustable range can be limited on the back of the dial. Input for external temperature reduction-3K is available. Colour, white polished RAL 9010. The back of the thermostat cover covers a standard junction box. An LK Pattress S1 to extend the thermostat's covering measurements is available as accessory.

Article	Designation	Width	Height	Depth	Voltage	Note	Packaging
241 72 87	S1	78 mm	78 mm	14 mm	24 V AC	-	1/50
241 72 91	S1 EXT	78 mm	78 mm	14 mm	24 V AC	Possible connection of LK External Sensor S1	1/50

LK Room Thermostat S1 (NC)

Electronic, soundless room thermostat with Triac-output and self-modulation technology. Available in models S1, S1 EXT and S1 Dti; S1 EXT and S1 Dti has got extra connections for the possibility to connect LK External Sensor S1 for control of floor temperature. The room thermostat is powered by 24 V AC and is designed for normally closed LK Actuator 24V (NC). Connection is normally made via LK Connection Box (NC) or via LK Connection Box 1. Max 5 LK Actuators 24V (NC) can be connected per room thermostat.

The room thermostat temperature range is between 5-35 °C. Adjustable range can be limited on the back of the dial. Input for external temperature reduction-3K is available. Colour, white polished RAL 9010. The back of the thermostat cover covers a standard junction box. An LK Pattress S1 to extend the thermostat's covering measurements is available as accessory.

LK Room Thermostat S2 (NO)

Electronic, noiseless room thermostat with Triac output and electronic feedback. Available in models S2 and S2 EXT, where S2 EXT can be connected to LK Remote Sensor ICS/S2 for controlling e.g. floor temperature. The thermostat is fitted to a standard electrical wall box or directly above the cables when these exit a wall via electrical conduit. For installation on a standard electrical wall box, use the pattress supplied.

- Voltage 24 V AC (NO Normally open)
- Switching power max 15 W
- Maximum of 5 LK Actuators per room thermostat
- Covers a standard electrical wall box with the pattress supplied
- Temp. range 5–45°C
- Input for temperature reduction -3K
- Can be connected to LK Remote Sensor ICS/S2 for control of floor temperature. Note: Applies to model S2 EXT.
- Colour, rear section RAL 9003, front white/polished ice grey

LK Connection Box 1

LK Connection Box 1 is a simple connection box used to regulate temperatures in small floor heating systems. The terminal is used for connecting and powering LK Room Thermostat S1 24 V with LK Actuator 24 V and LK Single Zone Manifold Control 24 V. A maximum of one LK Room Thermostat S1 24 V can be connected. The thermostat will control up to five LK 24 V Actuators. LK Connection Box 1 is powered via a LK Transformer 230V/24 V.

LK Actuator Relay 24 V

The LK Actuator Relay 24 V is intended for use when up to 12 LK Actuators 24 V need to be connected to one actuator output in the LK Connection Box or LK Receiver ICS.

The LK Actuator Relay is activated from optional actuator output in the LK Receiver ICS or LK Connection Box NO, thereby enabling up to 12 actuators to be controlled from the same channel/thermostat. The LK Actuator Relay 24 V is supplemented with LK Transformer 230/24 V. Either the LK Actuator 24 V NO (normally open) or the LK Actuator 24 V NC (normally closed) can be connected to the LK Actuator Relay 24 V. All LK Actuators 24 V that are connected must be of the same type.

ICS.2 wired/wireless communication

LK Room Thermostat RF ICS.2

Wireless room thermostat with background-lit display for easy and clear function display.

The display shows, the set and actual temperature, heating on/off, operating mode and any error messages etc.

For the best energy efficiency, the room thermostat uses a so-called self-modulation technique consisting of signal pulses to the valve actuators. The self-modulation technique means that the thermostat adjusts the power output in relation to the set temperature. When the temperature in the room approaches the set temperature, the power output is reduced to avoid overheating. This in turn, minimizes energy consumption.

During use of the thermostat's night set-back/economy temperature function, it works with the adaptive (self-learning) function. The buttons are lockable and as such the thermostat can also be used in a public environment. There is the possibility to connection a floor sensor (read more below LK External sensor ICS/S2). Furthermore there are functions such as Fire place function, Area restriction of the temperature range, By-pass setting of the floor heating circuit and more. The room thermostat is used together with LK Receiver Unit 1 ICS.2 and LK Receiver Unit 8 ICS.2. The connection is wireless.

The thermostat is available in the colours glossy white, silver-grey and glossy black.

Compatible with the ICS.2 series ONLY.

LK Receiver 8 ICS.2 (NO)

- The product has been discontinued, please contact your LK sales representative for information about the replacement product.

NOTE! The product has been discontinued, please contact your LK sales representative for information about the replacement product.

LK Receiver 8 ICS.2 is used together with LK Room thermostat RF ICS.2 (wireless) or LK Room thermostat W ICS.2 (wired).

Up to 8 LK Room thermostats ICS.2 can be addressed to the receiver unit, wired or wireless. The unit can control up to 12 floor circuits through LK Actuator 24 V (NO).

The unit has an in-built 24h program for valve and pump exercising. Furthermore, the unit is equipped with two potential-free outputs which, if necessary, are used for start/stop of pump

and heat source. For start/stop of pump and heat source to function in a large system, several receiver units can communicate with each other through a wireless connection.

Furthermore, the unit is equipped with 1 input terminal for temperature reduction through an external signal, for example, through GSM Switch. The unit can be supplemented with LK Webserver for control through mobile, tablet or computer. The system can also communicate through Modbus protocol for connection to a Building Management System (BMS).

From the in-built USB input of the receiver the under floor heating system can easily be logged for control and troubleshooting.

Compatible with the ICS.2 series ONLY.

LK Receiver 8 ICS.2 (NC)

- NOTE! The product has been discontinued, please contact your LK sales representative for information about the replacement product.

NOTE! The product has been discontinued, please contact your LK sales representative for information about the replacement product.

LK Receiver 8 ICS.2 (NC) is used together with LK Room thermostat RF ICS.2 (wireless) or LK Room thermostat W ICS.2 (wired).

LK Webserver

LK Webserver is used to access and control LK Room Temperature Control ICS.2 and LK Water Safety System from your mobile phone, tablet or computer. An intuitive interface makes it easy to both monitor, manage and control all the functions of the underfloor heating system through a web page. The system works with all the common market systems such as smartphones, tablets or computers with associated operating systems and web browsers such as Android, iPhone, iPad, Windows Phone, Windows PC, Mac, Linux, Firefox, Safari, Internet Explorer.

The first start-up/installation of the web server normally requires a Windows computer.

LK Webserver can also be used as a wireless communications bridge. This wireless communications bridge function is used when the Internet is unavailable in the property at

the underfloor heating installation's receiver unit. Two web servers are required where one web server is installed at the underfloor heating installation's receiver unit and the other at the property's Internet connection. A wireless communication bridge is set up between the web servers.

Shunts

LK Mini loop valve RTB

LK Mini loop valve RTB is designed to control smaller floor heating systems that are embedded in concrete or levelling compound with a pipe dimension of 8 mm, 12 mm, 16 mm or 20 mm.

Supplied with a capillary tube-connected thermostat, length 2 m.

Article	Packaging
243 53 44	1/160

LK Heater 350

LK Heater 350 is an electric comfort heater for floor heating installations with LK Minishunt M60n. The heater consists of an electric cartridge installed in a brass tub. The electric cartridge is controlled by an electronic controller for the constant regulation of the water temperature. The product is sold complete for 1 or 2 heating circuits in 12 or 16 mm pipe dimensions. The electric cartridge power is 350W and is sufficient under normal conditions for floor heating surfaces up to 12 m².

LK Minishunt M60n

Thermostat controlled shunt unit for use when smaller under floor heating systems are to be connected to an existing heating system. The shunt unit is to be used in systems with main pump in the primary circuit. Its capacity can be set at a flat rate of heating requirements of 50 W/m² to max 60 m² of floor heating area. The capacity is dependent on the primary temperature, pressure, floor heating installing system, etc. Then Shunt unit can be connected to series or parallel radiator systems. Assembly can be made in right or left operation.

Complete premanufactured shunt unit includes;

- Circulation pump Wilo Para RSB/6-43/SC
- Thermostat with room temp. sensor length 2 m
- Connectors for primary pipe connection 2 pcs CU15
- Temperature limiter of feed temperature
- VF valve

- Fill and drain valve and air bleed valve with hose nipple
- Bracket

Article	Width	Height	Depth	c/c pipes prim./sec.	Connection prim./sec.	Weight (kg)	Packaging

LK Manifold Shunt VS2

The shunt unit is to be used in systems with main pump in the primary circuit. Its capacity can be set at a flat rate of heating requirements of 50W/m² to max 200 m² of floor heating surface. The capacity is dependent on the primary temperature, pressure, floor heating installing system, etc. The included supply pipe allows in both left- and righthand assembly to LK Manifold RF.

The shunt unit is a complete pre-manufactured unit.

LK Manifold Shunt can be supplemented with LK Control v.3, Art. no. 241 73 25 for outdoor temperature control.

Items Included

- Circulation pump Grundfos UPM3 Auto L 15-70 130, with automatic speed control, 1 phase 230 V AC 50 Hz, max 45 W, 0,38 A
- Two way control valve Kvs value 2.5, equipped with hand actuator
- VF valve
- Temperature limiter of feed temperature
- Adjustment valve for the primary circuit
- Check valve
- 2 tube thermometers
- Isolation valves for primary circuit
- Fixing bracket

Article	Width	Height	Depth	c/c pipes prim./sec.	Connection prim./sec.	Weight (kg)	Packaging

LK Shunt 2/3-2,5

- Can be assembled in both right and left operation

The shunt unit is to be used in systems with main pump in the primary circuit. Its capacity can be set at a flat rate of heating requirements of 50 W/m² to max 300 m² of floor heating surface. The capacity is dependent on the primary temperature, pressure, floor heating installing system, etc. Complete pre-manufactured shunt unit.

LK Shunt can be supplemented with LK Control v.3, Art. no. 241 73 25.

Items Included

- Circulation pump Wilo Para 25-130/8-75/SC, with automatic speed control, 1 phase 230 V AC, 50-60 Hz, max 75 W, 0,66 A.
- Control valve Kvs 2,5 with change over function between 3- and 2-port execution, equipped with hand actuator
- Adjustment valve LK OptiFlow for the primary circuit
- Check valve
- 2 thermometers
- Isolation valves
- Fixing bracket

Heat Exchanger pack

LK Heat Exchanger Pack -10

The LK Heat Exchanger Pack 10 is primarily designed for glycol based under floor heating systems that must be isolated from other heating systems. Such heating systems are used in garden summer houses or garages, i.e. in areas where the maintenance of a minimum temperature is required during the winter or, can be completely closed off without the risk of the under floor heating system being damaged by freezing.

The LK Heat Exchanger Pack is a pre-assembled unit complete with heat exchanger, circulation pump, manometer, expansion vessel, filter and a control valve with automatic thermostat and sensor connected via a capillary tube. The control valve has settings for variable Kv values to adjust to the size of the project. The Heat Exchanger Pack is constructed so that it can be mounted directly to LK Manifolds RF. It can be connected to the right of the manifold.

For weather compensated heat regulation for floor heating LK Heat Exchanger Pack can be equipped with LK Control v.3- RA. LK Control v.3 -RA consists of a control unit, valve actuator, outdoor sensor and supply temperature sensor.

Article	Type	Connection prim./sec.	Weight (kg)	Packaging
241 88 10	2-3.2	3/4"/1"	12,5	1/32

LK Control v.3 RA

Outdoor temperature compensated heating control pre-programmed for LK's floor heating systems. Fits the product LK Heat exchanger pack -10 were it replace the thermostatic head. Consists of a control unit with temperature setback programs and pump control, valve actuators, outdoor sensors and flow sensors. Can be supplemented with LK Room Unit v.3 for affecting the room temperature and remote controlling certain functions of the control unit.

As an accessory LK GSM Switch is available for control via mobile phone. LK GSM Switch allows remote control of normal temperature and reduced temperature.

Article	Voltage	Weight (kg)	Packaging

Electric boiler

LK Electric Boiler VE9

LK Electric boiler VE9 is a wall-mounted electric boiler, mainly intended for low-temperature heating systems such as floor heating.

The power of the boiler can be adjusted in steps between 1-9 kW, which allows the boiler to be easily adapted to the property's fuses.

In case weather compensated control of the supply temperature in the heating system is required, the boiler can be supplemented with LK Reglercentral VRC 700/6, article no 620 38 36

The electric boiler is manufactured by Vaillant.

Article	Width	Height	Depth	Voltage	Output	Weight (kg)	Packaging
620 38 35	410 mm	740 mm	310 mm	400V	9 kW	32,9	1

LK Controller VRC 700/6

The LK Controller VRC 700/6 is a complement to the LK Electric boiler VE9 if weather compensated control of the supply temperature is desired.

Article	Length	Width	Depth	Packaging
620 38 36	150 mm	115 mm	47 mm	1

LK Electric Portable Boiler

The boiler is a portable/mobile boiler primarily for use as a temporary heater to dry concrete screeds and to heat houses during construction using its under floor heating. The boiler power is 9 kW and operates in two steps of 4,5 kW.

It's delivered as a complete unit with pump, expansion vessel, manometer, air-bleed valve and safety valve. Connection to the heating system is made with 1,0 m steel braided flexible hoses. The boiler is fully electrically wired and delivered with an 1,0 m cable and 3-Phase 400 V connection socket.

Temp. control is made by adjusting the thermostat.

Tools

LK Pipe Decoiler XL

- Easy to transport
- Delivered in a practical storage bag
- Quick assembly / disassembly

Tool for efficient installation of PE-Xa / PE-RT / PE pipes. LK Pipe Decoiler XL is particularly well suited for large and heavy pipe coils, such as the LK Snow Melting Pipe 25.

LK Pipe Decoiler XL is compatible with our entire range of pipes, regardless of product system.

Min. inner diameter of the pipe coil: 240 mm

Max. outer diameter of the pipe coil: 1600 mm

Max. weight of the pipe coil: 100 kg

Article	Packaging
243 55 21	1/10

LK Pipe Decoiler Compact

- Compact design
- Easy to transport
- Delivered in a practical storage bag

Tool for efficient installation of PE-X/PE-RT pipes. The pipe reel is easy to assemble/disassemble and allows for smooth loading and unloading of pipe rolls due to its compact design and low center of gravity. The pipe reel is compatible with our entire range of underfloor heating pipes, regardless of the dimension and length of the pipe roll. Delivered in a practical storage bag.

The pipe reel is also compatible with the following pipes from our Universal assortment:

188 23 35 Universal Pipe PiP X16/50m

188 23 36 Universal Pipe PiP X16/100m

188 23 67 Universal Pipe PiP X16/200m

188 25 41 Universal Pipe PiP X20/50m

188 25 42 Universal Pipe PiP X20/100m

187 06 94 Universal Pipe PiP X25/50m

LK Coil Cart

LK Coil Cart is an accessory for helping with laying of pipes for underfloor heating or tap water installations. The coil of the cart is made to fit the assortments of pipes available from LK Systems. The cart is mobile and easy to move between jobs with its wheels, but at the same time remains stationary when parked.

LK Manifold Stand

Stand for fixation of LK Manifold RF (under floor heating) and LK Manifold UNI (potable water) when installing in concrete on insulation. LK UNI Manifold must be mounted on LK Manifold Bracket.

Pipe fixings with bolts (Art. no. 241 94 99) are available as accessories for fixing LK Manifold Cabinet WP or LK Manifold Cabinet UNI when installing these on concrete slabs.

The stand is adjustable height- and sideways. Two 300 mm sleeves are included to prevent the bars being set in the concrete, allowing re-use of the stand.

Article	Width	Height	Weight (kg)	Packaging
241 78 19	800 mm	1500 mm	9,5	1

LK Cabinet Stand L2

LK Cabinet Stand is used for temporary fixing/hanging of LK Manifold Cabinet WP RF, LK Shunt Cabinet VS2 and LK Manifold Cabinet UNI. The cabinet stand is used when installing under floor heating or potable water in concrete over insulation when the cabinet shall be mounted before casting the concrete.

The cabinet stand consists of two steel poles, four pole clips complete with bolts which to connect to the rear/back of the cabinet and two 300 mm sleeve pipes. The sleeve pipes prevent the bars being set in the concrete, allowing re-use of the stand.

Article	Length	Packaging
243 55 16	2000 mm	1

LK Pipe fixing

Intended to be used with LK Pipe Pole for temporary fixing/hanging of LK Manifold Cabinet WP RF, LK Shunt Cabinet VS2 and LK Manifold Cabinet UNI.

Article	Packaging
241 94 99	4

Note! Sold in packages containing four pipe fixings.

LK Foot for Manifold/Cabinet Stand

A pair of feet to support the LK Manifold and LK Cabinet stand during installation on concrete slab.

Article	Length	Width	Height	Packaging
241 91 08	200 mm	30 mm	95 mm	1

LK Legs for Manifold Cabinet UNI/GV

Legs are for aiding assembly of LK Manifold Cabinet WP and LK Manifold Cabinet UNI. Advantageous when used on precast concrete floor slab. Manufactured from galvanized steel sheet.

Legs are supplied in pairs, including 4 x self tapping screws to fix to the manifold cabinet. The feet have 6 mm holes for fixing by floor or rawl bolt (not supplied) to concrete slab.

LK Staple Gun and LK Staples 3D Premium

Patented system for fixing clip rails and pipes.

LK Staple Gun 3D Premium is used together with LK Staples 3D Premium for attachment of LK Under Floor Heating Pipe to EPS insulation in e.g. pipe bends and between clip rails. LK Staple Gun 3D Premium is used together with LK Staples 3D Premium for attachment of LK Under Floor Heating Pipe to EPS insulation in e.g. pipe bends and between clip rails. The Staple Gun is also used for attachment of pipes to LK Foil board 30 silent.

The mechanism of the staple gun is safe and robust. If despite this a clip gets stuck in the mechanism, you can easily clean it by opening a cover and removing the clip which is stuck. LK Staples 3D Premium are particularly firmly attached in the EPS insulation, as the leg of the staple has a unique design equipped with holding nails on three sides.

The staples are welded together in rows to allow easy filling of the Staple Gun. The gun is filled with 75 staples each time it is loaded.

Material Consumption

- about 1 box/130 m² for the attachment of LK Clip-Rail 16 and LK Floor Heating pipe on cell foam insulation.
- about 1 box/29 m² for the attachment of floor heating pipe with c/c 200 on LK Foil Board 30 Silent.
- about 1 box/42 m² for the attachment of floor heating pipe with c/c 300 on LK Foil Board 30

- Silent.

The CO₂ equivalents represent the GWP-total (A1-A3) as a result from our EPD/environmental product declaration.

*Note! Sold in packages of 400 staples (1 = 1 carton à 400 staples).

** Refers to insertion length

LK Tightness Tester

- Easy tightness check in winter, where you don't have to empty the system of water after checking the tightness
- Simplified tightness testing with air
- Fits directly on GV filling valve (G15)

Simplified tightness control with air for certain pipe systems. If there is a risk of freezing or bacterial growth before a pipe system is to be put into operation, it is impractical to carry out a leak test with water. For pipe systems that have been tested for pressure resistance, a simplified tightness check can be carried out with air. This applies to systems for tap water and underfloor heating with plastic pipes that must be built or cast in.

LK Pipe Cutter

LK Pipe Cutter are high-quality pipe cutters for cutting PE-X and PAL pipes. LK Pipe Cutter comes in five sizes for 8-63 mm pipes.

- LK Pipe Cutter Mini 8-16 is a smal pipe cutter.
- LK Pipe Cutter 25 PRO has an automatic return setting and a conduit cutter for dimension 25-34 mm.
- LK Pipe Cutter 25 has an automatic return setting.
- LK Pipe Cutter 40 is fitted with gearing for better power.
- LK Pipe Cutter 63 is fitted with gearing for better power.

The cutter is made of magnesium alloy, which makes it very light despite its robust design. The blade is teflon coated and manufactured from quality steel.

Replacement blade is available as accessory and is easily changed.

ICS/ICS.2

LK Receiver ICS 1 (NC)

The LK Receiver ICS 1 is used with the LK Thermostat ICS. One LK Thermostat ICS can be addressed to the receiver unit. The unit can control up to five 24 V LK Actuators.

The unit has an integrated 24 h program for valve exercise.

The unit is supplied with an external transformer (EU plug). A transformer with UK plug is available as accessory (Article no. 33455).

Article	Designation	Width	Height	Depth	No. of channels	Communication	Weight (kg)	Packaging
---------	-------------	-------	--------	-------	-----------------	---------------	-------------	-----------

LK Receiver ICS 8 (NC)

The LK Receiver ICS 8 is used with the LK Room Thermostat ICS. Eight ICS Thermostats can be connected to the receiver unit. The unit can control up to twelve LK Actuators 24 V.

The unit has an integrated 24-hour program for valve and pump exercise. Receiver is equipped with two potential-free outputs for starting/stopping the pump and heat source. Multiple receiver units can be linked together to the BUS cable to ensure that starting/stopping of the pump and heat source will work in a larger system. Furthermore, the device is equipped with 1 input for temperature reduction via an external signal, such as GSM switch.

From the unit's integrated USB port, the floor heating system can easily be logged to check operations/troubleshooting.

Article	Designation	Width	Height	Depth	No. of channels	Communication	Weight (kg)	Packaging
241 73 16	LK Receiver 400 mm ICS-RF8	400 mm	120 mm	60 mm	8	Wireless	1,5	1/10

LK Connection terminal ICS/ICS.2

Two-pole terminal used for connecting the thermostat and actuator for LK Receiver ICS.

Three-pole terminal used to connect BUS cable to the LK Receiver ICS.

Article	Note	Packaging
33626	2 poles	1
33629	3 poles	1

LK Fuse T 200 mA

LK Fuse T 200 mA fits LK Connection Box NO and LK Receiver 8 ICS/ICS.2.

Article	Packaging
33641	1

LK Radio Link ICS

LK Radio Link ICS is used as an accessory/spare part to the LK Receiver ICS-W8 and LK Receiver ICS-W1. With the radio link connected, the wireless thermostat, LK Thermostat ICS-RF, is connected to the other wire-connected receiver units. It is thus possible to combine wireless and wire-connected communication in the same receiver unit. (Does not apply to the LK Receiver ICS-W1 or LK Receiver ICS-RF1.) The radio link is delivered with a connecting cable for connection to the receiver unit.

Article	Packaging

Basic S1

LK Room Thermostat S1 (NO)

Electronic, soundless room thermostat with Triac-output and self-modulation technology. Available in models S1, S1 EXT and S1 Dti; S1 EXT and S1 Dti has got extra connections for the possibility to connect LK External Sensor S1 for control of floor temperature. The room thermostat is powered by 24 V AC and is designed for normally open LK Actuator 24V (NO). Connection is normally made via LK Connection Box (NO) or via LK Connection Box 1. Max 5 LK Actuators 24V (NO) can be connected per room thermostat.

The room thermostat temperature range is between 5-35 °C. Adjustable range can be limited on the back of the dial. Input for external temperature reduction-3K is available. Colour, white polished RAL 9010. The back of the thermostat cover covers a standard junction box. An LK Pattress S1 to extend the thermostat's covering measurements is available as accessory.

Article	Designation	Width	Height	Depth	Voltage	Note	Packaging
241 72 87	S1	78 mm	78 mm	14 mm	24 V AC	-	1/50
241 72 91	S1 EXT	78 mm	78 mm	14 mm	24 V AC	Possible connection of LK External Sensor S1	1/50

LK Room Thermostat S1 (NC)

Electronic, soundless room thermostat with Triac-output and self-modulation technology. Available in models S1, S1 EXT and S1 Dti; S1 EXT and S1 Dti has got extra connections for the possibility to connect LK External Sensor S1 for control of floor temperature. The room thermostat is powered by 24 V AC and is designed for normally closed LK Actuator 24V (NC). Connection is normally made via LK Connection Box (NC) or via LK Connection Box 1. Max 5 LK Actuators 24V (NC) can be connected per room thermostat.

The room thermostat temperature range is between 5-35 °C. Adjustable range can be limited on the back of the dial. Input for external temperature reduction-3K is available. Colour, white polished RAL 9010. The back of the thermostat cover covers a standard junction box. An LK Pattress S1 to extend the thermostat's covering measurements is available as accessory.

Article	Designation	Width	Height	Depth	Voltage	Note	Packaging
---------	-------------	-------	--------	-------	---------	------	-----------

LK Connection box (NO)

LK Connection Box NO used to connect and power up LK Room Thermostat S1 24V NO, and LK Actuator 24V NO. The box has an integrated transformer 230/24V AC 40VA.

Up to 8 LK Room Thermostat S1 24V NO and max 12 LK Actuator 24V NO can be connected to the box. The box is equipped with a volt-free relay that make it possible to connect/control a circulation pump. The box has an integrated 24-hour valve and pump logic exercise program.

LK Connection was first sold in 2002. It can also be used to replace earlier models of connection boxes such as:

LK Connection Box V (Art. no. 241 79 04). Sold in 2001-2004.

LK Connection Box (Art. no. 241 75 87) with green or red LEDs. Sold during 1994-2001.

Basic S2

LK Room Thermostat S2 (NO)

Electronic, noiseless room thermostat with Triac output and electronic feedback. Available in models S2 and S2 EXT, where S2 EXT can be connected to LK Remote Sensor ICS/S2 for controlling e.g. floor temperature. The thermostat is fitted to a standard electrical wall box or directly above the cables when these exit a wall via electrical conduit. For installation on a standard electrical wall box, use the pattress supplied.

- Voltage 24 V AC (NO Normally open)
- Switching power max 15 W
- Maximum of 5 LK Actuators per room thermostat
- Covers a standard electrical wall box with the pattress supplied
- Temp. range 5–45°C
- Input for temperature reduction -3K
- Can be connected to LK Remote Sensor ICS/S2 for control of floor temperature. Note: Applies to model S2 EXT.
- Colour, rear section RAL 9003, front white/polished ice grey

Article	Designation	Length	Width	Depth	Note	Packaging
243 43 99	S2	112 mm	80 mm	16 mm	-	1/25
243 44 01	S2 EXT	112 mm	80 mm	16 mm	Possible connection of LK External Sensor ICS/S2	1/25

LK External Sensor ICS.2/S2

LK Extern Sensor ICS/S2 is an accessory for the LK Thermostat ICS.2-RF/W alternatively LK Room Thermostat S2 EXT in order to regulate, for example, the floor temperature.

Article	Length	Packaging
---------	--------	-----------

LK Pattress S2

LK Pattress used to expand cover dimensions of the thermostat. Always used when installing against the equipment box. Intended for LK Room Thermostat S2 and S2 EXT. Color white 9003.

Article	Length	Width	Depth	Packaging
33454	116 mm	80 mm	2 mm	1

LK Connection box (NO)

LK Connection Box NO used to connect and power up LK Room Thermostat S1 24V NO, and LK Actuator 24V NO. The box has an integrated transformer 230/24V AC 40VA.

Up to 8 LK Room Thermostat S1 24V NO and max 12 LK Actuator 24V NO can be connected to the box. The box is equipped with an volt-free relay that make it possible to connect/control a circulation pump. The box has an integrated 24-hour valve and pump logic exercise program.

LK Connection was first sold in 2002. It can also be used to replace earlier models of connection boxes such as:

LK Thermostatic Head M60n/RTB

Spare part for LK Minishunt M60n and LK Mini loop valve RTB

Not compatible with LK Minishunt M60.

Article	Packaging
33049	1/10

LK Control Valve Set M60n/RTB

Spare part for LK Minishunt M60n and LK Mini loop valve RTB

Use LK Socket M60n/RTB (33074) to dismantle/assemble the control valve.

Article	Packaging
33037	1/10

LK Socket M60n/RTB

Used for disassembly and reassembly of LK Socket M60n/RTB

Article	Dim.	Packaging
33074	13 mm	1

LK Accessory bag M60n

Spare part for LK Minishunt M60n.

Article	Packaging
298 90 23	1

LK Pump Connector Angle Alpha

Spare part / accessory for Grundfos Alpha 1 and Alpha 2L

Minishunt M60

LK Connection Coupling RF CU

LK Connection coupling RF CU for primary connection to LK Minishunt M60 manufactured after September 2012 with ¾" EuroConus connection.

Article	Intended for	Dim.	Nipple conn.	Packaging
241 94 65	CU	15x1,0 CU	¾" EuroCone	1/24/240

LK Connection Coupling 12/16/20 x CU 15x1

LK Connection Coupling CU for primary connection to LK Minishunt M60 manufactured after September 2012.

Article	Dim.	Nipple conn.	Packaging
241 78 45	Cu 12x1,0	12/16/20	1/250/50
241 78 46	Cu 15x1,0	12/16/20	1/50

LK Thermostatic valve M60 (conn. 12/16/20)

Thermostatic valve v.1 (Giacomini) for LK Minishunt M60.

This valve was used until 2009. Thereafter it was replaced by LK Thermostatic valve v.2 M60-LKA until 2012-09. There after LK Thermostatic valve v.3 M60-LKA is used, art no 339 57.

Note! Not compatible with M60 with thermostatic valve from LKA.

Article	Connection	Packaging
---------	------------	-----------

LK Air vent ½"

Manual air vent for LK Minishunt M60.

Article	Dim.	Packaging
83321	½"	1

LK Key to air vent M60

Fits manual air vent ½", Art. no. 83321.

Article	Packaging
83322	1

LK Handwheel M60

Handwheel for manual adjustment of the inflow at LK Minishunt M60.

Article	Packaging
33955	1

LK Temperature limiter M60

Complete temperature limiter for LK Minishunt M60.

Article	Packaging
33927	1/10

LK Electric cartridge 350

Electric cartridge for LK Heater. The electric cartridge is available in three different versions. Early versions of the LK Heater had glued thread for the electric cartridge. Those cartridges are not possible to remove. In these cases, there are pre-assembled heating cartridges as below.

1. Loose electric cartridge.
2. Electric cartridge pre-assembled in manifold with 1 outlet.
3. Electric cartridge pre-assembled in manifold with 2 outlets.

Note that the replacement must be carried out by a qualified electrician.

Article	Output	Note	Packaging
33231	350 W	Electric cartridge only	1/4
33233	350 W	Electric cartridge assembled in manifold 1	1/4
33234	350 W	Electric cartridge assembled in manifold 2	1/4

Wilo WS8 Connector

Connector device for Wilo Yonos Para and Wilo Stratos Para.

Article	Voltage	Packaging
33931	230 V AC	1

LK Adapter 12/16/20 to ¾" male

Fits:

LK Manifold VKF/VKF-i. Joint nipple from thread (nipple conn. thread 12/16/20) to the male 3/4" EuroCone thread.

LK Minishunt M60. Joint nipple for primary connection to LK Minishunt M60 manufactured before September 2012. The joint nipple is used, if needed, to get over to thread connection 3/4" EuroCone.

Article	Nipple conn.	Packaging
---------	--------------	-----------

LK Plug 1/2"

Fits:

LK Manifold RF. Fits the 1" end cap with 1/2" outlet on the manifold.

LK Minishunt M60. Fits the 1/2" connection with is used when the system being filled up.

Article	Packaging
83323	1

LK Joint nipple with loose nut 1" x 1/2"

For pump connection to LK Minishunt M60/M60n.

Article	Design	Dim.	Packaging
241 94 57	Nickel plated	1" loose nut x 1/2" female	1/10

LK Fiber gasket 1" Graphite

1" graphite gasket for LK Minishunt M60.

Article	Packaging
33935	1

LK Temperature limiter M60n / RTB

Manifold shunt VS/CS

LK Replacement pump Grundfos Alpha1

Replacement pump for:

LK Manifold Shunt VS

LK Manifold Shunt CS.

LK Manifold Shunt 2/3 -0,63/1,0/2,5

LK Electric Portable Boiler

Years 2001 to 2003 the shunt group LK Manifold Shunt 2/3 was supplied with Myson Cp 53 130 mm. After 2003 to 2007 was it supplied with Grundfos UPS 15-40 130.

LK Manifold Shunt was supplied with Grundfos UPS 15-60 130 mm between 2007-2011.

LK Electric Portable Boiler was until November 2013 supplied with Grundfos UPS 15-60 130 mm. Thereafter with Grundfos Alpha 2L 15-60 130 mm.

Replacement pump Grundfos Alpha1 15-60 130 mm replaces Myson Cp 53, Grundfos UPS 15-40 and Grundfos UPS 15-60. Pump connector included.

NOTE! Pay attention to a longer dimension on the drive side than Myson Cp 53 and Grundfos UPS 15-40/UPS 15-60.

Article	Designation	Connection	Packaging
33030	Grundfos Alpha1 15-60	1"	1

LK Pump connector VS Pump

Connector to pump Grundfos Alpha 2L.

Article	Designation	Voltage	Packaging
33029	Plug connection Alpha pump	230 V	1

LK Thermometer -20 - 60°C

LK Thermometer -20 - 60°C, shaft Ø9. Fits LK Manifold RF, LK Manifold Shunt VS, LK Manifold Shunt CS, LK OptiFlow EVO II.

Article	Temp. range	Packaging
243 52 54	-20 - 60° C	1/20

LK Thermometer 0 - 80°C

Fits:
LK Manifold RF, LK Manifold Shunt VS, LK Manifold Shunt CS, LK OptiFlow EVO II

Article	Temp. range	Packaging
243 47 47	0-80° C	1

Shunt 2/3

LK Hand actuator

Fits LK Shunt 2/3-1,6, LK Shunt 2/3-2,5 and LK Manifold Shunt UHP-6,3.

Article	Packaging
32780	1

LK Replacement pump LK Shunt 2/3

LK Shunt 2/3-1,6 had Myson CP 63, conn. 25 with construction length 180 mm assembled.

LK Shunt 2/3-2,5 had Grundfos UPS 25-60 construction length 130 mm assembled. This was changed at the turn of 2012/2013 to Wilo Yonos Para RS 25/6-RKA. This was changed in march 2023 to Wilo Para 25-130/8-75/SC.

LK Shunt 2/3-4,0 and 2/3-6,3 had Grundfos UPS 25-80 construction length 180 mm assembled. This was changed at the turn of 2012/2013 to Wilo Stratos Para 25/1-8. This was changed in march 2023 to Wilo Yonos Para HF 25/7 180.

Please note! 33076 & 33077 does not include pump connector.

Article	Designation	Intended for	Length	Packaging
33076	Wilo Yonos Para HF 25/7 180	LK Shunt 2/3-4,0 & 2/3-6,3	180 mm	1
33077	Wilo Para 25-130/8-75/SC	LK Shunt 2/3-2,5 and LK Manifold Shunt UHP-6,3	130 mm	1

Wilo WS8 Connector

Connector device for Wilo Yonos Para and Wilo Stratos Para.

Article	Voltage	Packaging
