

LK Manifold cover Qmax

DESIGN

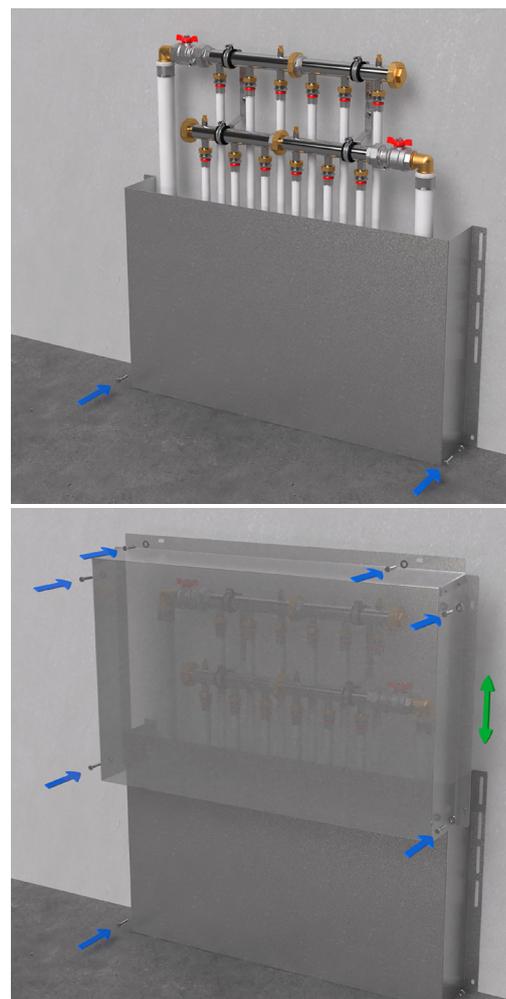

LK Manifold cover Qmax is designed for use where you want to protect LK Manifold Qmax G50 in an outdoor installation. The cover is made from a 2 mm galvanised steel sheet and is designed to be installed outdoors against a wall. The cover protects a Qmax manifold with up to 6 outlets.

LK Manifold cover Qmax is delivered in two parts. Plugs and screws are not included. Hole width for attachment is 10 mm.

ASSEMBLY

LK Manifold cover Qmax is designed to be installed against a wall or other appropriate building structure. Start assembly by installing the lower part of the cover. Then install the cover's upper part, using an appropriate plug and screw with regard to the wall material.

The cover is height adjustable. The lowest possible height is 875 mm, measured on the inside. The highest possible height is 1,240 mm, measured on the inside. Take note of this when installing the manifold.
